submarines was started in workshop 9. At that time, only three crankshafts each
 with a weight of about 400 kg were stored. The production was to start very slowly.

3. Work was done in three shifts, i.e. from 0600 to 1400 hours, from 1400 to 2200 hours
 and from 2200 to 0600 hours. Since there were not enough workers to fill all three
 shifts, only individual machines were working at a time in accordance to the work
 orders received and to the varying power supply.

4. The plant buildings housed the following departments:

Building 1 : Supply depot with small unfinished parts and tools

Building 2 : Apprentice workshop with 160 apprentices

Building 3 : Research and development department

Building 4 : Assembly shop for motor scooters and conference hall

Building 5 : Supply depot with large unfinished and large prefabricated parts
 and machines. Shipping department. The building had a loading ramp

Building 6 : Assembly shop for "Dieselameisen" (sic) (Diesel ants) and plant
 maintenance. It was planned to transfer the assembly shop to Building 4
 in order to have more room for the maintenance.

Building 7 : Production shop for small parts

Building 8 : Production shop for large parts

Building 9 : Assembly shop for KVD-125 type 2,500-hp Diesel engines for submarines

Building 10: No information available

Building 11: Tool production shop
